

AUSROAD®

NUMBER ONE
FOR
ROAD
MAINTENANCE //

AUSROAD®

Established in 1990, AUSROAD® is a Road Maintenance vehicle manufacturer located in Queensland, Australia. We supply innovative, high quality, reliable vehicles to councils and leading contractors Australia wide, with a strong focus on increasing safety, accuracy and efficiency on the project site.

Over 30 years, AUSROAD® has built a global reputation for providing unmatched results that are second to none. We deliver on time with confidence and can quickly and efficiently adapt to customers' individual requirements.

Ausroad specialises in customising Road Maintenance equipment for purchase or why not wet or dry hire an Ausroad Road Maintenance unit and start making a difference today.

SAFETY. ACCURACY. EFFICIENCY.

AUSROAD® JETMASTER

JETMASTER

The Ausroad Jetmaster is the trusted name in Road Maintenance plant. Versatility of application makes the Jetmaster a valuable asset in not only routine sheeting and edge repairs, it rapidly deploys to remediate storm damaged pavements over large areas. Ausroad Jetmaster units are commonly utilised on the coastal areas to the remote regions of Australia.

It features the unique Venturi distributor that minimises blockage with other special operator safety features including the non-tipping hopper that eliminates height clearance and weight shifting situations.

The front mounted boom allows full visibility whilst driving reducing operator fatigue.

Operator controlled rear arrow board and roof signage and high profile warning devices makes the unit very noticable to other approaching road users whilst in operation.

BETTER FUNCTIONALITY

- 2.4m width of spray sealing, with easily selected control with 300mm segments or narrow strips.

- Road Maintenance functions are operated safely from cabin. Operator easily controls function from joystick controller and control screen.

- Operator interface is set out in a logical layout to provide effortless function control with remote access support options.

- Edge break repairs are a breeze with cabin control of rotary broom stone / spray selection. Operates on both left and right hand side for increased application.

- Road profile correction using full width adjustable screed bar.

- Dedicated national maintenance support from our manufacturing hub in Brisbane Australia and dedicated fleet maintenance facility in central Qld.

AUSROAD® HD SERIES TRUCK

INTRO

Ausroad Horizontal Discharge Trucks are your no.1 Choice for safe asphalt transportation and application. Keeping material centre of gravity low at all times. All units contain emulsion storage for tac coating and feature heated hopper and weatherproof covers the HD series is well suited to your region.

A large range of attachments to suit your Road Maintenance requirements, contact Ausroad to discuss your requirements today.

A large number of Local Government also utilise the HD Series for remediating crash scenes with sand reducing manual handling and time.

CUSTOMISATION

At Ausroad we like to cater to individual needs, we understand requirements may be different for each purpose.

When purchasing one of our vehicles we can supply to any different variable, to allow for better productivity for our clients.

Consider the below options, to name a few:

- Larger Hopper

- Heating options - 240v - heat tracing - heated nozzles
- Tool rack storage
- Self-loading emulsion options
- Roller shutter / lift doors
- Load cells

Talk to Ausroad, our in house engineers are happy to tailor a solution to meet your requirements.

HIRE AND CONTRACT OPTIONS

We understand some circumstances do not require a full time service of our vehicles, especially in emergency situations like un-foreseen damage during natural disasters.

Ausroad provide a fleet of well-maintained Road Maintenance machines nationally.

The Jetmaster and HD Series trucks are available for long and short term hires with wet or dry options.

At Ausroad we have a dedicated National Hire Manager who ensures the best customer experience. With all hire vehicles we offer full training for all operators with ongoing support for the entire hire period. We work with you when a vehicle is due for maintenance with a fast turnaround and dedicated National Road Maintenance Manger especially assigned for hire vehicles.

If you require an Ausroad Road Maintenance unit for short or long term and you want to reduce capital held, we are here to support your operation. Contact support @ausroad.com.au.
