

LEADERS IN

Mine & Blast Support

ABOUT AUSROAD®

AUSROAD is a specialised mining plant, vehicle body manufacturer based in Queensland, Australia. We supply innovative, high quality reliable Stemming Trucks, along with other mine & blast support vehicles, to leading domestic and international mining companies. Our strong focus on enhancing safety, accuracy, and efficiency on mine sites has positioned us as industry leaders.

For over 35 years, AUSROAD has built a global reputation for delivering unmatched results that are second to none. We've earned the trust of some of the world's largest mining companies.

We offer full customisation across our fleet and pride ourselves on our ability to develop tailored solutions that solve real-world challenges. From Stemming Trucks to cutting-edge, first-of-their-kind innovations, our focus is clear: delivering the best equipment to help you get the job done—safer, faster, and smarter.

AUSROAD Stemming Trucks + Mine & Blast Support Vehicles

SAFETY | ACCURACY | EFFICIENCY

AUSROAD® STEMMING TRUCK

World-Leading Accuracy. Maximum Efficiency. Proven Safety.

AUSROAD Stemming Trucks set the global benchmark for stemming operations, trusted by mining companies worldwide for their unmatched precision, reliability, and safety.

With a 20-tonne payload on a 42 GVM chassis and even greater capacity available for higher GVM configurations — these trucks are designed for serious performance in demanding mine site environments.

Each unit features advanced dust suppression and an integrated water tank offering full water truck functionality with capacities ranging from 1200L up to 8000L*.

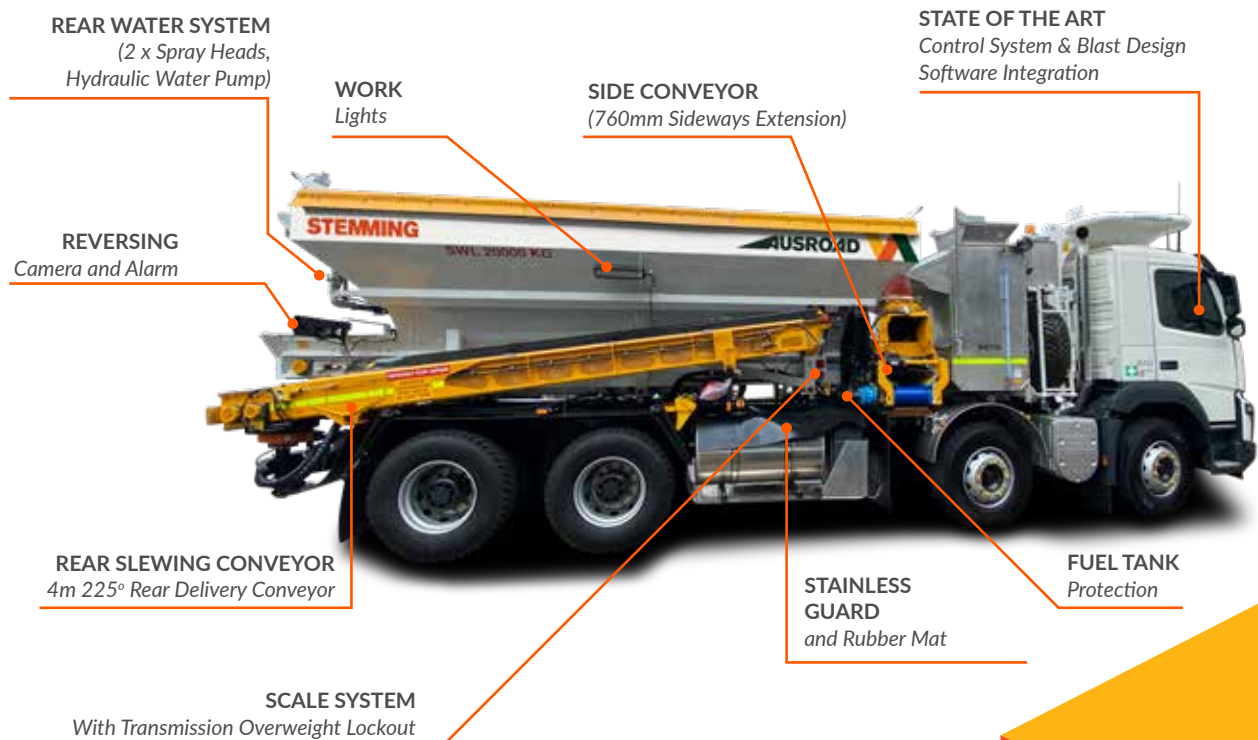

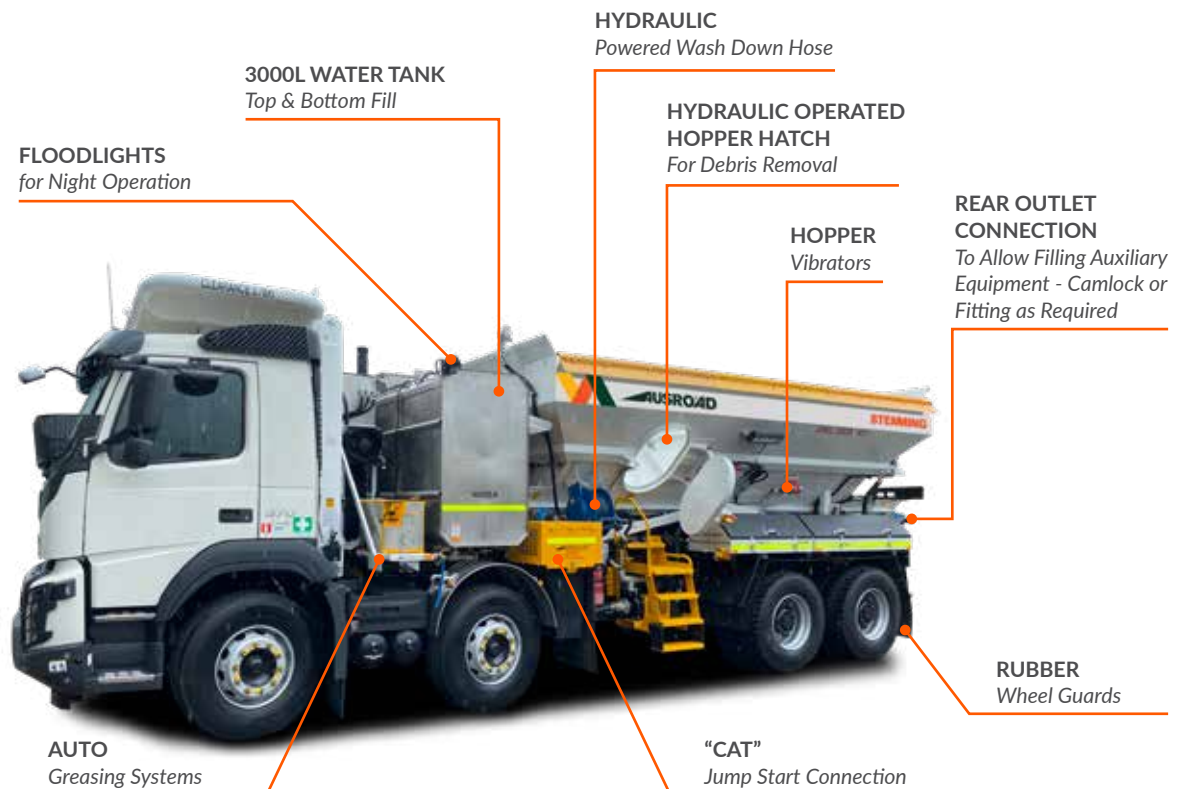

Precision is at the core of every AUSROAD Stemming Truck, with stemming placement calibrated to within 0.1 metres — ensuring every blast is executed with consistent accuracy and maximum control.

**Engineered for productivity. Built for safety.
Trusted worldwide.**

*Water tank capacity varies by configuration.

STEMMING TRUCKS - QUICK FACTS

STEMMING TRUCKS SPECIAL FEATURES

- Full Water Truck capabilities

- Dust suppression on discharge of material to protect ground crew

- Wash down hose with hydraulic pump and 3000L water tank

- Hydraulic operated hopper hatch

- State of the art control system
- Reverse camera
- Scale system with transmission overweight lockout
- Automated calibrated delivery with blast design software integration

• BlastLogic Integration System

Seamless interface between Blastlogic tablets and Ausroad Stemming Trucks.

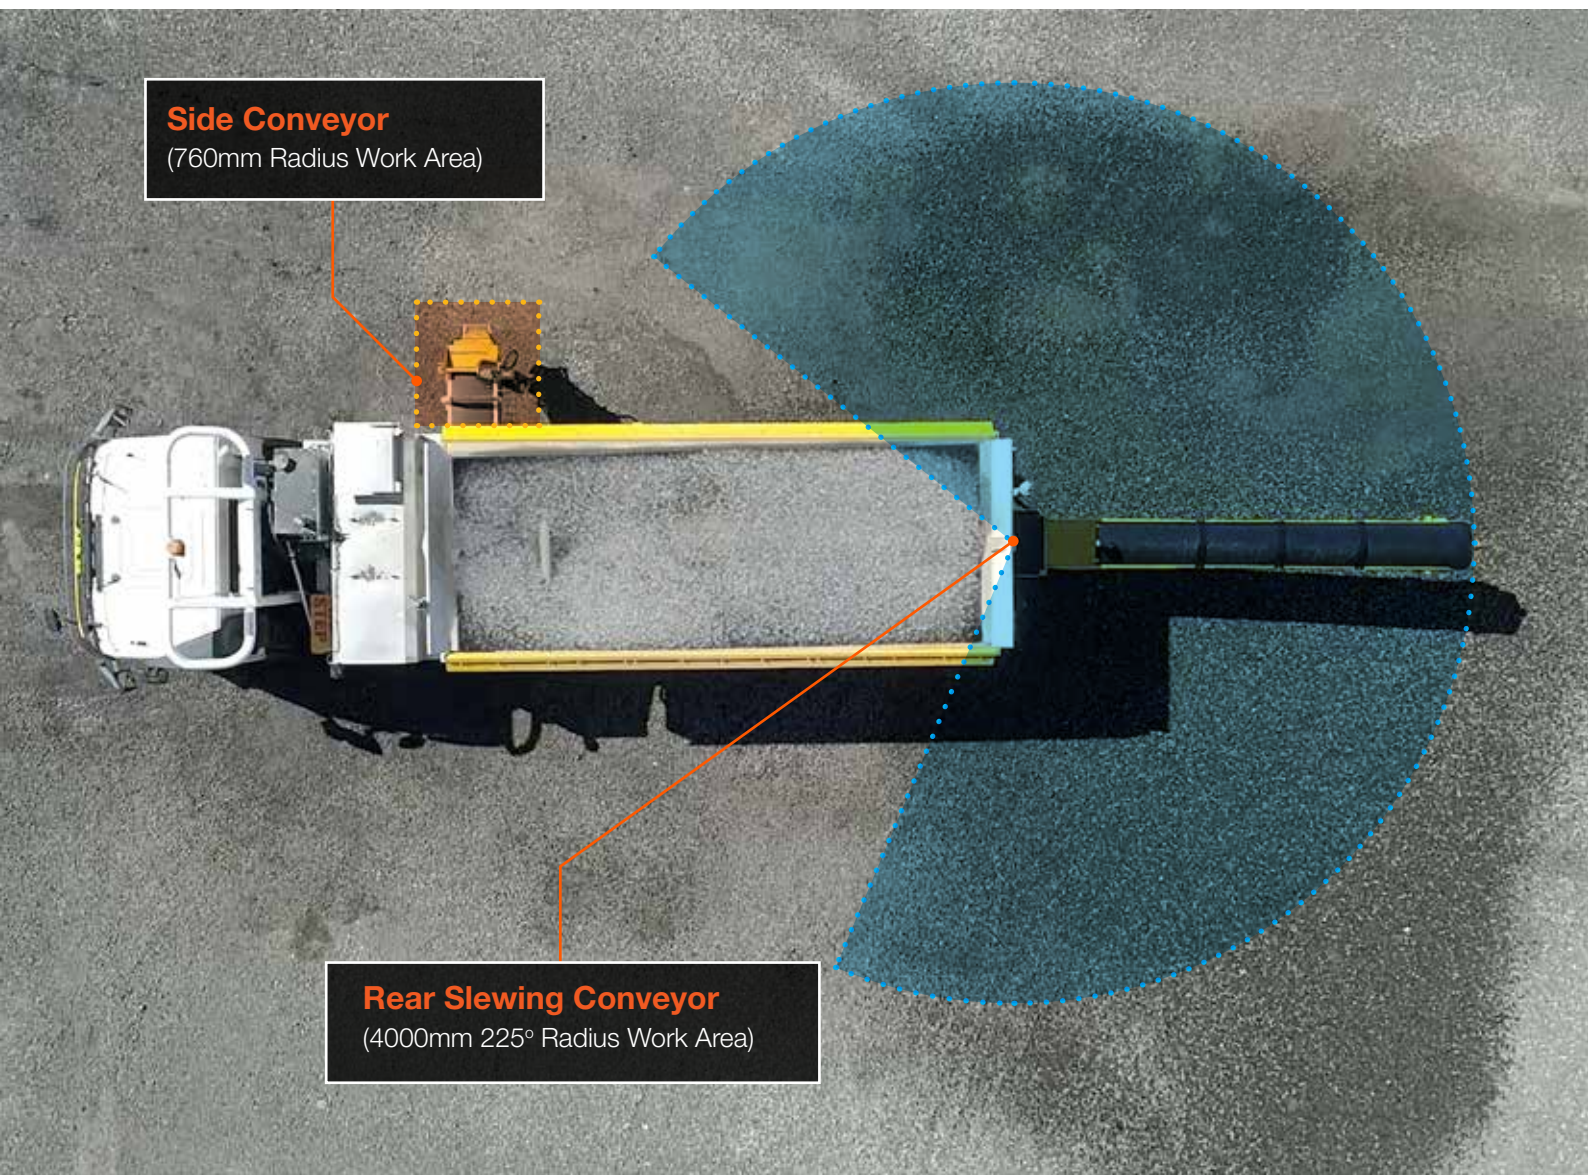

- Allows real time stemming data exchange.
- Eliminates manual entry
- Reduces the risk of human error
- Improves data accuracy
- Enhances productivity

Local Maintenance Facilities in Australia

- Archerfield, Queensland
- Moranbah, Queensland
- Jandakot, Western Australia

MAXIMUM WORKING RADIUS

INTRODUCING AUSROAD'S NEXT-GENERATION DRILLING & BLASTING FLEET

Ausroad's expanded fleet reaffirms our commitment to safer, smarter, and more cost-effective mine blasting operations. We understand that getting the blast right the first time is critical to maximising mineral extraction, and our new suite of purpose-built blasting vehicles is designed to do exactly that:

Deliver consistency, reliability, and performance on every shot.

Backed by decades of engineering expertise and deep experience in the mining sector, this new fleet is the result of relentless focus on solving real-world challenges in the field.

At Ausroad, we don't settle for business as usual. We continually push the boundaries with innovative solutions tailored to the unique demands of mine sites, because we know that when your blasting vehicles perform better, your whole operation does too.

AUSROAD® VAC TRUCKS

Making blasting operations safer, more reliable and more cost-effective.

Purpose-built for mining environments, the AUSROAD Vac Truck is a fully hydraulic vacuum excavation unit, allowing the safe removal of stemming from loaded blastholes.

Designed for precision, safety and efficiency.

Whether in routine use or on standby, this truck adds a critical layer of support to your blasting operations. It allows operators to single-prime confidently, knowing

that any issues with loaded holes can be addressed swiftly.

The Vac Truck enables safe and efficient removal of stemming, allowing for immediate repriming and reducing the risk of misfires to zero.

VAC TRUCKS - QUICK FACTS

Mine site compliant truck fitted with ROPS

Separator / Cooling tank fitted with water level sight gauge

Backsense radar for detecting moving and stationary objects

4 x Spoil Tank Door Hydraulic Locks

Potable hose reel 25m 3/8 pressure hose with locking pin for quick and easy filling of Separator / Cooling tank or wash down

The latest cutting edge in earthing system. Earth-rite static earthing system does not allow Vac section to work if no earth is found or lost during excavation

High Clearance 4WD

Auxiliary hard wired pendent control can be plugged into socket, should the remote fail

Jurop 4" boom carousel fully remote control with 270degrees slewing rotation from boom stow cradle to reduce manual handling of the static resistant hose. First of its kind for VAC TRUCK INDUSTRIES.

Clear site glass for easy inspection

Wash Down Lances

AUSROAD® WATER TRUCKS

Engineered for Harsh Conditions. Built to Keep Dust Down.

AUSROAD Water Trucks are purpose-built to perform in the toughest mining environments. Designed with durability and safety in mind, these vehicles deliver reliable dust suppression across large-scale operations.

With an impressive 21,000L capacity (on 8x4 chassis), they provide efficient wet-down coverage to minimise dust disturbance — enhancing visibility, improving on-site air quality and reducing health and safety risks.

Like every AUSROAD vehicle, safety is not just a feature — it's the foundation. Rugged, reliable and mine-ready, these water trucks are the go-to solution for controlling dust and keeping operations running smoothly.

AUSROAD® SHOT UTE

Safe. Compliant. Built for the Blast.

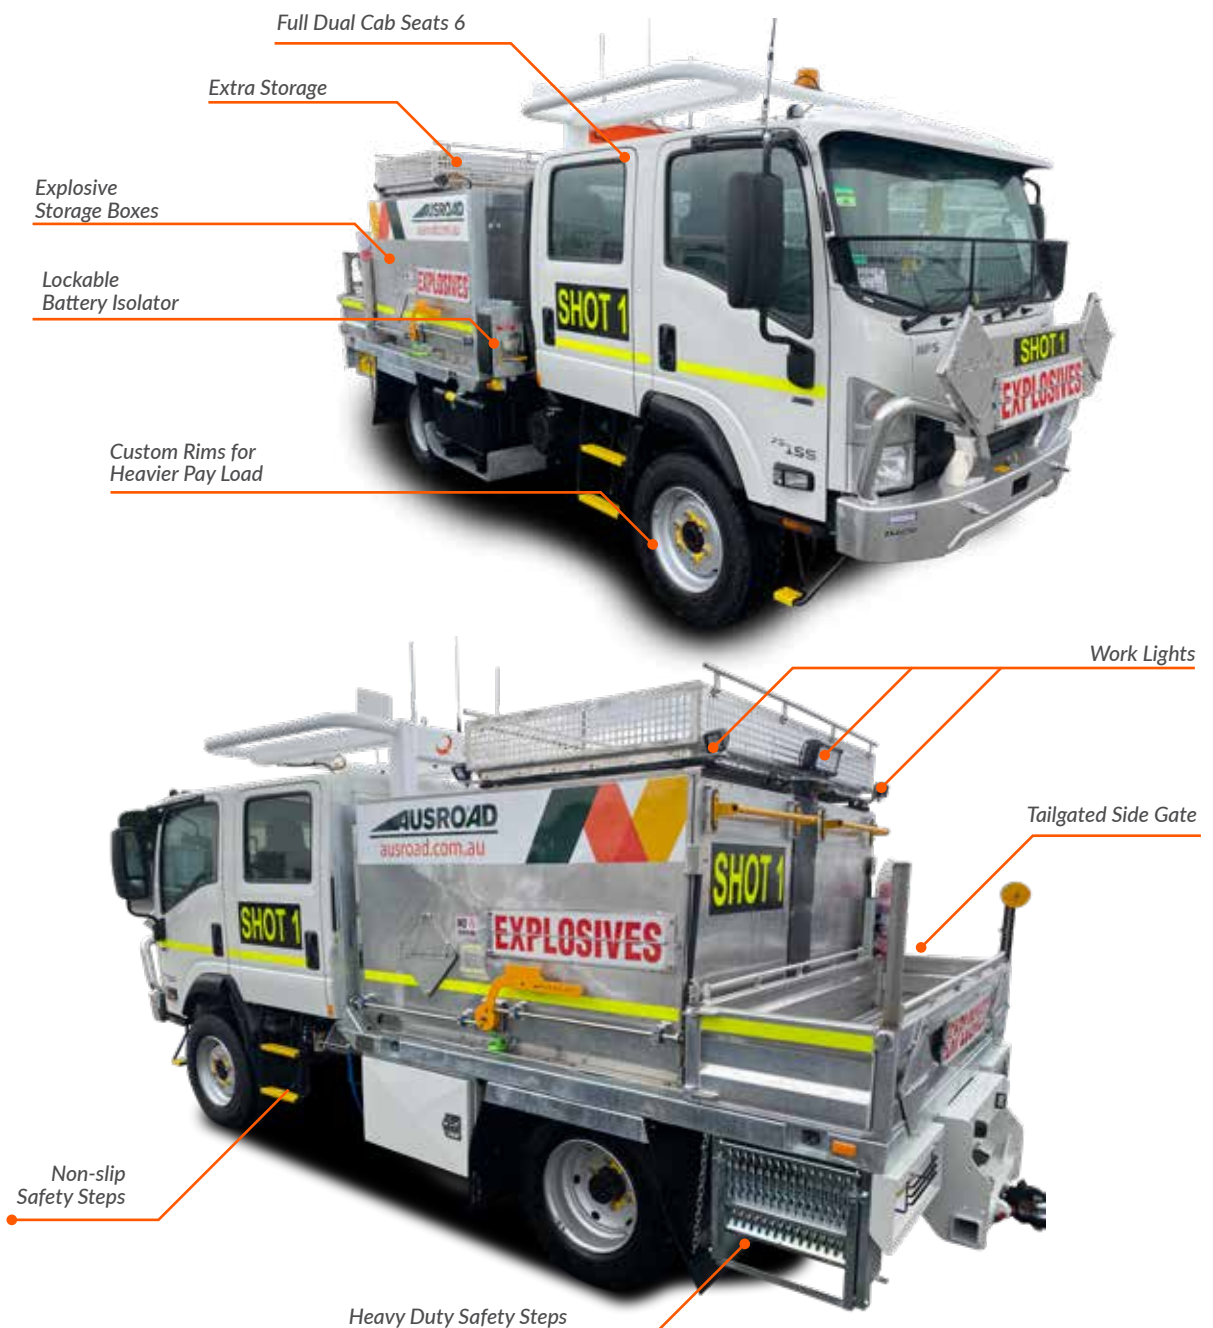

The AUSROAD Shot Ute is purpose-built to meet AEC Cat 2 compliance, allowing shotfirers to transport electric detonators and boosters safely — stored separately and securely.

Designed with both safety and efficiency in mind, each ute features custom-engineered cargo areas.

With the option of increased GVM, the AUSROAD Shot Ute reduces the need for multiple trips to explosive magazines — streamlining operations while keeping safety front and centre.

Engineered for the realities of blasting, so you can focus on getting the job done right.

SHOT UTE - QUICK FACTS

AUSROAD® DEWATERING TRUCKS

Efficient Water Removal. Safer, Smarter Blasting.

Built to meet the highest standards of mining performance, the AUSROAD Dewatering Truck is designed to remove water from blast holes quickly, safely and efficiently, helping operators reduce costs without compromising results.

With a fully hydraulic pump system operated from the comfort of the air-conditioned cab, the operator remains protected while maintaining full control.

No manual handling. No unnecessary delays.

Simply drive up to each hole, activate the pump and remove water with ease. This streamlined process allows for the use of more cost-effective blasting products, improving productivity while maintaining blast quality.

Fast. Reliable. Designed for the real conditions of mine sites.

DEWATERING TRUCKS - QUICK FACTS

AUSROAD® TIPPER TRUCKS

Tough, Reliable, Ready.

Our Ultimate Heavy Tipper Trucks are designed for maximum efficiency and safety and built to withstand the toughest mine site conditions. With its robust reinforced steel construction and impressive payload capacity of up to 50 tonnes, this truck is the perfect solution for heavy-duty hauling.

TIPPER TRUCKS - QUICK FACTS

AUTONOMOUS TRUCK HAULAGE

Designed for autonomous operation, reducing operator costs and increasing efficiency

HEAVY-DUTY CONSTRUCTION

Built with reinforced steel for maximum durability and strength

EASY MANOEUVRING

Expertly designed for seamless navigation around mine sites

HIGH PAYLOAD CAPACITY

Available in 38-tonne or 50-tonne payload options

REPLACEABLE INTERIOR WEAR PLATE

Ensures longevity and reduces maintenance costs

CUSTOMISABLE

Can be tailored to suit specific applications, with or without rear door

AUSROAD® DUAL PURPOSE TRUCKS

Two Functions. One Powerful Solution.

AUSROAD has combined the precision of its world-leading Stemming Trucks with the durability and safety of its high-capacity Water Trucks to deliver a smart, dual-purpose solution.

Designed for clients who want to maximise fleet efficiency, this combination truck streamlines operations

by enabling both stemming and dust suppression from a single platform — reducing downtime, equipment costs and on-site vehicle movements.

One truck. Twice the capability. All the reliability you expect from AUSROAD.

DUAL PURPOSE TRUCKS - QUICK FACTS

The water is distributed via a "Pump-out" access connection as well as two rear-mounted water sprays for watering down blast patterns and roads

FITTED WITH

- 2000L Potable Water Tank
- 6000L Raw Water Tank
- 14 Tonne Swl Stemming Body
- Or Any Combination Of The Above

A water cannon and high-pressure water pump can be fitted to aid wash down of equipment.

AUSROAD® STEMMING CONTOUR LOADER

World-First Innovation for Challenging Terrain.

Introducing a breakthrough in blast support technology—the AUSROAD Stemming Contour Loader.

This purpose-built, radio-controlled, track-based vehicle is the first of its kind, designed specifically to perform stemming operations across steep, uneven or contoured terrain with exceptional safety and precision.

Fitted with a robust rubber track system, the vehicle delivers outstanding stability, traction and

maneuverability in even the most rugged environments. Its advanced remote-control functionality allows operators to maintain full control from a safe distance, reducing risk while boosting efficiency.

Engineered for the Ground Ahead | Wherever it Leads.

STEMMING CONTOUR LOADER - QUICK FACTS

CUSTOMISATION

Tailored Solutions for Every Site.

At AUSROAD, we understand that no two mine sites are the same. That's why we offer fully customised vehicle designs and tailored inclusions to meet your site-specific requirements.

Built on a foundation of engineering excellence, our business is committed to enhancing productivity and profitability through smart, site-adapted solutions.

Have a unique challenge or an idea for a new vehicle? Talk to us. Many of our innovations have been developed in direct response to client needs — including our On-Demand Tyre Lifter.

Designed, engineered, and constructed in just two months, this custom-built solution was created to eliminate manual handling. The tyre lift allows two truck tyres to be lifted and safely secured at once — protecting workers and improving efficiency on-site.

From custom inclusions to completely new designs.

If you **can imagine** it,
we can build it.

COMPETITIVE ADVANTAGES / UNIQUE SELLING PROPOSITION

What Sets AUSROAD Apart.

At AUSROAD, safety is more than a priority — it's embedded in everything we do. It drives our product innovation, guides our on-site practices and ensures our equipment supports safer outcomes for every client. From cutting-edge technology that reduces manual handling to robust, operator-focused design, our commitment to safety is the foundation of our success — and yours.

Our team is a specialised, dynamic group of professionals with deep industry knowledge across engineering, manufacturing and mining operations. Known for our responsiveness, flexibility and technical capability, we've built a global reputation for delivering dependable, fit-for-purpose solutions that perform in the field.

We don't just supply equipment — we engineer confidence. With rigorous product design, extensive customisation options and a strong focus on operational efficiency, AUSROAD delivers:

- **Proven safety-first design**
- **Industry-leading accuracy and reliability**
- **Customisation to suit unique site needs**
- **Hire, lease or purchase flexibility**
- **Fast turnaround on new innovations**
- **A reputation built on results — for over 35 years**

HIRE AND CONTRACT OPTIONS

Flexible Solutions. Trusted Support. Immediate Availability.

AUSROAD offers both wet and dry hire, along with tailored contract services, to clients across Australia and around the globe. Whether you need short-term support or a long-term operational partner, we deliver equipment and expertise you can rely on.

Our low-hours fleet of Stemming and Water Trucks is meticulously maintained and ready for immediate deployment. Backed by highly trained operators and decades of field experience, our contract services are designed to deliver maximum uptime and performance.

When you hire from AUSROAD, you receive:

- ✧ Delivery to any location across Australia
- ✧ Full training and ongoing technical support
- ✧ Access to experienced materials handling professionals with 25+ years' experience
- ✧ Reliable, well-maintained vehicles
- ✧ Regional maintenance hubs and responsive, on-call service
- ✧ A dedicated hire manager to assist with every aspect of your operation

Need equipment on-site fast? Want a partner that delivers more than just machinery?

Contact us today to explore hire and contract options tailored to your site.

PLANT MAINTENANCE

Keeping your fleet on the road, where it belongs..

AUSROAD workshops specialise in heavy vehicle servicing and repairs, supporting industries that rely on trucks and machinery every day. We offer complete solutions, including diesel engine diagnostics, truck repairs and preventative maintenance, ensuring your fleet stays roadworthy.

We have experience servicing major brands such as Volvo, Isuzu, Mack and Scania. Our certified technicians use modern diagnostic tools to keep your vehicles performing at their best.

Whether it's scheduled maintenance or urgent repairs, we provide reliable, professional service tailored to heavy vehicle operators.

Our Maintenance facilities allow local businesses in Western Australia, Brisbane and Central Queensland to rely on our expertise to minimise downtime and reduce repair costs.

Local Maintenance Facilities in Australia

OUR CUSTOMERS

Trusted by the World's Leading Mining Companies.

At AUSROAD, we're proud to support some of the largest and most respected mining operations across Australia and around the world. Our longstanding partnerships are built on a foundation of trust, performance and a shared commitment to safety and innovation.

With a proven track record of delivering reliable equipment, responsive service and tailored solutions, AUSROAD continues to be the preferred supplier for companies that demand the highest standards.

Global capability. Local commitment. Proven performance.
