

LEADERS IN

Road Maintenance

PROUDLY SERVICING LOCAL GOVERNMENTS ACROSS AUSTRALIA

AUSROAD is a Preferred Supplier and Approved Contractor on the National Procurement Network (Australia)

Contract: NPN1.23 Trucks, Buses, Specialised Trucks, Bodies & Trailers

ABOUT AUSROAD®

At AUSROAD®, we've been designing and building tough, reliable road maintenance vehicles in Queensland since 1990. With over 35 years of hands-on experience, we know what it takes to get the job done — safely, accurately, and efficiently.

From Local Councils to global contractors, our machines are trusted by the people who keep roads operating. Why? Because we don't just meet expectations — we help our customers exceed them. Whether it's building smarter tech, improving safety on-site, or tailoring equipment to suit your needs, we're always pushing the benchmark.

Need flexibility? We've got you covered with a fleet of high-performance vehicles available for both wet and dry hire, ready when and where you need them.

At AUSROAD, we're not just in the business of machines — we're in the business of solutions.

SAFETY | ACCURACY | EFFICIENCY

It's what we stand for

AUSROAD® MULTIPATCHER™

The Ausroad Multipatcher is the definitive solution in road maintenance plant, engineered for superior performance and strength.

The AUSROAD Multipatcher is a purpose-built road maintenance unit trusted by councils and contractors across coastal and remote regions of Australia.

Designed for single-operator control from the cabin, this robust unit streamlines essential repairs—like potholes, edge breaks and rutting, through its industry-exclusive Venturi delivery system.

Built with safety, visibility, and performance in mind, the Multipatcher features a front-mounted boom for clear forward vision, non-tipping hopper for stable loads, and in-cabin controls that reduce fatigue and boost productivity.

Whether you're conducting routine repairs or responding to storm-damaged pavement, the Multipatcher delivers fast, high-quality, and cost-effective results—every time.

BETTER FUNCTIONALITY

2.4m width of spray sealing, easily selected control with 300mm segments or narrow strips.

Road Maintenance functions are operated safely from the cabin. Operator easily controls function from joystick controller and control screen.

Operator interface is set out in a logical layout to provide effortless function control with remote access support options.

Edge break repairs are a breeze with cabin control of rotary broom stone / spray selection. Operates on both left and right hand side for increased application.

Road profile correction using full width adjustable screed bar.

Dedicated national maintenance support from our manufacturing hub in Brisbane Australia and dedicated fleet maintenance facility in Central Queensland, Australia.

AUSROAD® HD SERIES TRUCK

Engineered for Safe, Efficient Asphalt Transport and Application.

Ausroad Horizontal Discharge (HD) Trucks are the leading solution for safe and efficient asphalt handling, designed to maintain a low centre of gravity for enhanced stability during transport and application.

Each unit is equipped with integrated emulsion storage for tack coating, a heated hopper, and weather-resistant covers—ensuring reliable performance in all conditions.

Purpose-built for a range of road maintenance applications, including small and large-scale pothole repairs, heavy maintenance, patch compaction, and general surface restoration, the HD series maximises productivity while using cost-effective materials to deliver long-lasting, high-quality repairs.

A comprehensive range of optional attachments are available to tailor your solution to specific operational requirements.

*Optional Road Safety
Signs Patrol / Arrow Board*

*4 x Built in
Toolboxes*

*Variable Size Emulsion
Tanks Available*

*Various Cab
Chassis Available*

*Electric
Weatherproof Tarp*

Reverse Camera

*Paver for
Heavy Patching*

*Optional
Spare Tyre Storage*

*Easy to Swap
Between Accessories*

Towing Capability

AUSROAD® POWDER SPREADER

Precision. Power. Performance.

The AUSROAD Powder Spreader is a premium construction vehicle engineered for efficient, high precision material distribution. Ideal for soil stabilisation and full-depth reclamation (FDR), this advanced machine delivers consistent results across demanding terrain.

Featuring a high-capacity hopper, the system conveys material to the back of the truck after going through an aerated spreader box that breaks up clumps, ensuring a fine, even flow to be distributed across three adjustable gates, allowing precise coverage across the full width of the spread.

A built in intuitive touchscreen control panel inside the cabin, provides the operator with real-time adjustment of spread rates based on ground speed and specific project requirements.

High-Capacity Hopper

Holds large volumes of cement mix for continuous operation.

Precision Spreading

Aerator and adjustable gates ensure even material distribution.

Smart Operator Controls

Touchscreen interface automatically adjusts flow to suit speed and site conditions.

Cutting Edge Powder Spreading Solutions

AUSROAD® FLUIDISED POWDER SPREADER

Continued innovation for improved application.

Ausroad's latest fluidised powder spreader has been specifically designed to improve application of dry cement or hydrated lime powder (and blends) to the ground surface in a controlled and even spread for road construction, soil stabilisation, or ground improvement work.

The fluidised powder spreader truck uses an air-bed system in the base of the wedge-shaped hopper to secure smoother flow and distribution of the powder. This system injects high-flow (650 cu/ft/min), low-pressure (4 psi) air into the powder.

As the air passes through the powder, it lifts and separates the fine particles, breaking up the cohesion. This process is called **FLUIDISATION**, and it causes the powder to behave like a free-flowing fluid.

Fluidisation ensures smooth and consistent flow of the powder to the discharge spreader boxes at the rear of the truck. It also helps prevent bridging, minimise moving parts, and allows full discharge of the load, ultimately resulting in a significant reduction of waste.

CRACK SEALING TRAILERS

Easy, Efficient & Safe.

AUSROAD is proud to be the exclusive distributor of CIMLINE Crack Sealing Trailers in Australia, delivering world-class crack sealing technology to local road networks.

The Crack Sealing Trailer is built for simplicity, efficiency, and safety — offering long-term value and superior pavement preservation.

Its low-profile design allows for safe, ergonomic loading, helping to reduce operator fatigue and improve onsite safety. A high-efficiency diesel-fired heating system with a double-jacketed boiler ensures consistent melting

performance, while the electrically heated hose and wand system provides precise application with minimal waste.

With automated run, clean-out, and cool-down modes, the CIMLINE Crack Sealing Trailer is easy to operate and requires minimal crew training. Quiet operation and low emissions make it ideal for use in both urban and regional settings.

Available for sale or hire, the CIMLINE Crack Sealing Trailer is a smart solution to extend pavement life and maximise road performance.

KEY BENEFITS

Lightweight and easy to tow with a light vehicle

User-friendly control panel for seamless operation

Electrically heated hose for optimal sealant application

Overhanging boom with hose reduces trip hazards, ensuring a safe working environment

Electric start Isuzu engine for reliable performance

Large 495L product capacity and spacious fuel tank for extended use

Electric brakes for added safety and control

EMULSION SYSTEMS // SKIDS | TRAILERS | TRUCKS

Achievement is unlimited with an Ausroad emulsion system.

AUSROAD Emulsion systems deliver unmatched versatility and performance for road maintenance operations. Choose AUSROAD for reliable, high-performance emulsion solutions that keep your crews moving and your business ahead of the game.

MAIN FEATURES

Pressurised & Heated Emulsion Tanks Up To 3000 Litres.

Spray Bars & Retractable Reel Wands

Clean Up - Kero / Water / Diesel Tanks Up To 1000 Litres.

Storage For: Signs / Road Tools / Traffic Control / Amenities

Body Options: Stairs / Drop-Side Handrails / Gas Bottles / Weed-Mat / Pal Fingers

Towbar Accessories: Tow-Balls / Pintles / Ringfeders / Multiple Sockets

Bins: Shovel-Cleaning / Rakes / Spoil / Sand

Electrical: LED Worklights / Cameras / In-Cab Control Systems / Arrow Boards

CUSTOMISATION

At Ausroad, we understand that every client has unique requirements.

That's why we offer customised solutions when you purchase one of our vehicles, ensuring optimal productivity for your operations.

Here are a few options to consider:

- Larger Hopper
- Additional lighting
- Additional camera views
- Various cab chassis options
- Heating options available
- Tool rack storage
- Self-loading emulsion options
- Roller shutter / lift doors
- Load cells

Contact Ausroad to discuss your needs; our in-house engineers are ready to tailor a solution to meet your specific requirements.

HIRE AND CONTRACT OPTIONS

At AUSROAD, we understand that not every situation requires full-time use of our vehicles—especially during unexpected events such as natural disasters or urgent road repairs.

That's why we offer a fleet of well-maintained Road Maintenance Machines available Australia-wide. Our Multipatcher and HD Series trucks are ready for both short and long-term hire, with the flexibility of wet or dry hire options to suit your operational needs.

Whether it's a planned project or an emergency response, AUSROAD has the equipment and support to keep your roads safe and operational.
