

AUSROAD[®]

NUMBER ONE
FOR
MINE & BLAST
SUPPORT //

APS 34

Established in 1990, AUSROAD® is a specialised mining plant vehicle manufacturer located in Queensland, Australia. We supply innovative, high quality, reliable vehicles to leading domestic and international mining companies, with a strong focus on increasing safety, accuracy and efficiency on the mine site.

Over 30 years, AUSROAD® has built a global reputation for providing unmatched results that is second to none. We deliver on time with confidence and can quickly and efficiently adapt to customers' individual requirements.

We specialise in customisation for full purchase or hire / lease options depending on requirements.

SAFETY. ACCURACY. EFFICIENCY.

AUSROAD® STEMMING TRUCKS

THE NUMBER ONE CHOICE FOR COAL AND IRON ORE MINES ACROSS WORLDWIDE

AUSROAD® Stemming Trucks lead the way in stemming operations across the world, delivering unrivalled accuracy, reliability and safety.

Ausroad's Stemming Trucks have a large payload and capacity at 20 tonnes. With additional features including dust suppression and a 3000L* water tank for full water truck capabilities.

AUSROAD® Stemming Trucks have calibrated accuracy to 0.1 metres and high performance is a hallmark of the design.

* Up to 8000L volume

STEMMING TRUCKS QUICK FACTS

AUSROAD® STEMMING TRUCKS

SPECIAL FEATURES

- Full Water Truck capabilities

- Dust suppression on discharge of material to protect ground crew

- State of the art control system
- Reverse camera
- Automated calibrated delivery with blast design software integration
- Scale system with transmission overweight lockout

- Hydraulic operated hopper hatch

- Wash down hose with hydraulic pump and 3000L water tank

- Local maintenance facility (Western Australia and Queensland, Australia)

Rear slewing conveyor

MAXIMUM WORKING RADIUS

Side conveyor (760mm radius work area)

Rear conveyor (4000mm 225° radius work area)

INTRODUCING A NEW DRILLING AND BLASTING FLEET

This expanded fleet reflects Ausroad's commitment to making mine blasting safer and more cost effective. They understand that getting a blast right first time is essential in maximising the value of minerals extracted and this new comprehensive suite of blasting vehicles is an efficient and reliable way of ensuring this.

The Ausroad team's extensive engineering experience with the mining industry has played a crucial part in developing the new vehicle fleet.

Rather than accepting business as usual, the Ausroad team look to use innovative solutions to better meet industry's unique requirements.

AUSROAD® VAC TRUCK

A fully hydraulic operated hydro excavation unit fitted with remote controls for operators to efficiently and safely manoeuvre the machine to complete projects not accessible by other means without having to leave the comfort of the airconditioned dual cab.

This unit on standby allows the customer to single prime patterns knowing that if there are any issues with a loaded hole they can quickly & safely Hydro Vacuum the stemming off the hole and reprime to have zero misfires. Making blasting safer and cost effective.

AUSROAD® WATER TRUCKS

DELIVERING RELIEF FROM DRY AND DUSTY CONDITIONS

AUSROAD® Water Trucks have been designed to survive rugged mining conditions. They are built tough.

As with every AUSROAD® vehicle, safety is at the forefront of this truck's design and application. With a massive water capacity of 21,000L, these trucks are the vehicle of choice for large scale mines needing efficient wet down processes to reduce dust disturbance and subsequently increase safety.

WATER TRUCKS QUICK FACTS

AUSROAD® SHOT UTE

Shot utes are designed to comply with AEC Cat 2 and allow shotfirers to carry a full load of electric detonators and boosters separately.

Safety and efficiency were key factors in the design: A series of custom designed cargo nets prevent loads moving around when driving, and extra storage facilitates larger explosive cargoes. The utes are also engineered to carry heavier loads, reducing the need for multiple trips back and forth to explosive magazines.

AUSROAD® DEWATERING TRUCK

Built to the highest mining standards, the Dewatering Truck enables customers to pump water from blast holes quickly and efficiently, providing the opportunity to select more cost-effective blasting products while achieving the same results. The hydraulic pump is able to be controlled from inside the cab allowing the operator to remain in the vehicle's air-conditioned comfort while operating the unit. Simply drive to each hole that needs de-watering and effortlessly pump the water out, making the de-watering process more efficient and convenient.

DUAL PURPOSE TRUCKS

Combining the efficiency of its world-leading Stemming Trucks, with the safety of its durable water trucks, AUSROAD® has developed a combination Stemming and Water truck for clients who want to get the most out of their equipment.

Fitted with a 2000L portable water tank, a 6000L raw water tank & a 14 tonne SWL Stemming Body, or any combination of the above

The water is distributed via a "Pump-out" access connection as well as two rear-mounted water sprays for watering down blast patterns and roads

A water cannon and high-pressure water pump can be fitted to aid wash down of equipment.

STEMMING CONTOUR LOADER

Introducing the world's first vehicle of its kind: This purpose-built, radio-controlled, track-based vehicle is engineered to perform stemming operations across hilly and contoured terrains with unmatched safety, efficiency, and precision. Equipped with a rubber, track-based system, the Stemming Contour Loader ensures maximum stability and agility on all terrains. The advanced radio-control feature enables operators to maintain a safe distance while maintaining full control of the vehicle.

Fully guarded conveyor and rotating parts

Staged inclinometers with visual and audible alarms

Work lights

Rated tow points front and rear

CUSTOMISATION

The AUSROAD® Group knows not every mine site is the same. That's why we offer tailored inclusions and will customise designs of any of our trucks to your specifications.

Our business is built on a foundation of engineering expertise, we are committed to adapting our fleet to enhance mine site productivity and consequently profitability.

Or if you have an idea for a new vehicle please let us know, for example our on demand, new tyre lifter, developed in response to a request by a client to eliminate manual handling.

With an amazing 2 month turn around, the team at AUSROAD designed, engineered and constructed this world exclusive tyre lift.

The tyre lift enables 2 truck tyres to be lifted at a time and be secured helping to keep employees safe and healthy.

COMPETITIVE ADVANTAGES / USP

The AUSROAD® Group knows safety is fundamental to our company's and our clients' success. That is why it is at the forefront of every operation and the first consideration in new product development. From new technology paving the way forward for staff safety to on-the-ground management, Ausroad's commitment to safety is part of our DNA.

The AUSROAD® Group is a specialised, dynamic team of professionals with years of diverse industry experience. The Company has a trusted reputation for versatility, flexibility and quality. With thorough product design and technical knowledge, AUSROAD® delivers unrivalled safety, efficiency and reliability.

HIRE AND CONTRACT OPTIONS

AUSROAD® offers both wet and dry hire and contracts to clients across Australia and the world.

We have a low hours fleet of Stemming and Water Trucks, well maintained with immediate availability. We have significant contract operations employing trained and experienced operators.

When you hire an AUSROAD® Stemming or Water Truck you'll receive:

- Delivery to any part of Australia
- Full training and backup support
- An experienced and dedicated team with over 25 years of experience in materials handling
- Well-maintained vehicles
- Regional maintenance centres for support, with the team on-call
- Dedicated manager to assist with all inquiries

To discuss hire and contract options for your operation, talk to us today.

OUR CUSTOMERS

The AUSROAD® Group is proud to continue its longstanding partnerships with the world's biggest mining companies.
