

AUSROAD®

NUMBER ONE FOR MINING STEMMING TRUCKS

Established in 1990, AUSROAD® is a specialised mining plant vehicle manufacturer located in Queensland, Australia. We supply innovative, high quality, reliable vehicles to leading domestic and international mining companies, with a strong focus on increasing accuracy, efficiency and safety on the mine site.

Over 30 years, AUSROAD® has built a global reputation for providing unmatched results that is second to none. We deliver on time with confidence and can quickly and efficiently adapt to customers' individual requirements.

ACCURACY. EFFICIENCY. SAFETY.

AUSROAD® STEMMING TRUCKS

THE NUMBER ONE CHOICE FOR COAL AND IRON ORE MINES ACROSS WORLDWIDE

AUSROAD® Stemming Trucks lead the way in stemming operations across the world, delivering unrivalled accuracy, reliability and safety.

Ausroad's Stemming Trucks have a large payload and capacity at 20 tonnes. With additional features including dust suppression and a 3000L* water tank for full water truck capabilities.

AUSROAD® Stemming Trucks have calibrated accuracy to 0.1 metres and high performance is a hallmark of the design.

* Up to 8000L volume

STEMMING TRUCKS QUICK FACTS

SPECIAL FEATURES

- Full Water Truck capabilities

- Dust suppression on discharge of material to protect ground crew

- State of the art control system
- Reverse camera
- Automated calibrated delivery with blast design software integration
- Scale system with transmission overweight lockout

- Hydraulic operated hopper hatch

- Wash down hose with hydraulic pump and 3000L water tank

- We provide dedicated national maintenance support through our manufacturing hub in Brisbane, Australia, our fleet maintenance facility in Central Queensland, and our Perth-based depot and parts warehouse.

- Rear slewing conveyor

Side conveyor (760mm radius work area)

Rear conveyor (4000mm 225° radius work area)

DUAL PURPOSE TRUCKS

Combining the efficiency of its world-leading Stemming Trucks, with the safety of its durable water trucks, AUSROAD® has developed a combination Stemming and Water truck for clients who want to get the most out of their equipment.

Fitted with a 2000L portable water tank, a 6000L raw water tank & a 14 tonne SWL Stemming Body, or any combination of the above

The water is distributed via a "Pump-out" access connection as well as two rear-mounted water sprays for watering down blast patterns and roads

A water cannon and high-pressure water pump can be fitted to aid wash down of equipment.

CUSTOMISATION

The AUSROAD® Group knows not every mine site is the same. That's why we offer tailored inclusions and will customise the design to your specifications.

AUSROAD® specialises in designing and manufacturing a wide range of mine support vehicles, from innovative Contour Stemming units to Drills Support and Service Vehicles.

COMPETITIVE ADVANTAGES/USP

The AUSROAD® Group knows safety is fundamental to our company's and our clients' success. That is why it is at the forefront of every operation and the first consideration in new product development. From new technology paving the way forward for staff safety to on-the-ground management, Ausroad's commitment to safety is part of our DNA.

The AUSROAD® Group is a specialised, dynamic team of professionals with years of diverse industry experience. The company has a trusted reputation for versatility, flexibility and quality. With thorough product design and technical knowledge, AUSROAD® delivers unrivalled safety, efficiency and reliability.
