

## MULTIPATCHER™ WET HIRE SERVICE

### AUSROAD INNOVATION

Road maintenance is made easy with the Ausroad Multipatcher road maintenance wet hire truck including operator! Campaign loading road repairs in your region with ease with a dedicated “Wet Hire Service”. This service consists of operators on roster who maintain the truck on continuous duty.

The Ausroad Multipatcher will arrive at your site with a competent operator and Bulk Float Combination (BFC) with additional capacity to store emulsion in the trailer mounted 2000L tank and a commute vehicle.

The Multipatcher Wet Hire Service provides flexibility in how the Multipatcher is utilized in your region to achieve your targets.

#### Benefits:

- » Arrive to your site with up to 4000L of bulk emulsion when trailer deployed
- » Self-loading from static supply of emulsion
- » Load additional emulsion IBC's, up to eight. This gives the Ausroad Multipatcher unit the ability to deploy to an area and complete road repairs over a greater area more efficiently with 12,000L of emulsion in close proximity. Great for campaigning remote areas or islands
- » Rostered competent operators keep your Ausroad Multipatcher hire unit productive and consistent throughout the contract

### FULL TRAINING AND BACK UP SUPPORT PROVIDED.

Ausroad Multipatcher Truck Bulk Float Combination (BFC).

More Emulsion where it counts

Multipatcher standard 4,000L of CRS Emulsion Storage

Additional Transport Storage for 8000L Emulsion via IBC's

1 operator minimising costs

Rostered operators for continuous operating

### AUSROAD ADVANTAGE

Ausroad operates this service confidently utilising the latest additions to the dry hire fleet with direct support from our manufacturing base in Brisbane. The unit rarely needs to return to its base and instead moves contract to contract providing competitive mobilisation rates along the way. Ausroad offers a national hire service with the experience to engage customers in any region.

Due to this service being compact our 1-person operation is quick to mobilise and deploy across a region to repair flood affected areas or book ahead to perform annual scheduled works at low cost.

The Multipatcher operator accesses road maintenance software such as Reflect / Recovery saving time in the office quantifying works performed. Truck is GPS monitored for safety and quality assurance. Our operators have access to satellite communication when working in remote destinations.
